Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the claims recite a liquid crystal display device comprising a plurality of lamps are arranged such that LED chips realizing R, G, and B colors are built in the respective lamps and wherein the planar surface of the diffusion plate is uniformly and directly exposed to light emitted by the plurality of lamps. None of the references cited disclose this combination.

Farrell (USPN 5,143,433) teaches night vision backlighting system for LCD having a low-level intensity light sources (LEDs; 38) being utilized for backlighting displays.

Pelka (USPN 6,007,209) teaches backlighting device having a second series of LEDs (red, green, & blue) is mounted within the cavity on the bottom wall of the housing (Figure 4).

Because none of the references disclosed the combination of LED chips realizing red, green, and blue colors are built in the respective lamps and where the planar surface of the diffusion plate is uniformly and directly exposed to light emitted by the plurality of lamps (R, G, & B), nor is there any motivation to combine them, the claims are deemed patentable over the prior art of record. Claims 1-22 are allowed.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Amendment

3. The proposed reply filed on 2/11/2005 has been entered.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
